Dear Mr. Hullinger,

Receipt of your notice for limestone quarry operations on the M-H claims in T. 9S. R. 4W., Section 35 is acknowledged. As discussed with Steve Brooks, limestone must contain 95% carbonate to be locatable, i.e. subject to mining claims. Please provide analyses that indicate the purity of the limestone.

You are responsible for reclamation of all disturbances that have occurred on the property after January 1, 1981 when the Surface Management Regulations became effective. I am unable to determine the scope of operations since 1981 from your submission. Please provide this additional information and contact Steve Brooks at 524-5348 to arrange for a field examination. Thank you for your cooperation.

Sincerely yours,

Howard Hedrick
